

Why RICOH  
Scanners are  
the standard:  
a DMV  
weighs in

There's a reason you see RICOH scanners (formerly Fujitsu) everywhere. From front desk in-take to back office support, IT understands: When what you make doesn't break, word spreads.

## Fast and quiet, premium scanning: The ADF Flatbed fi-8270

Midwestern DMV:  
leasing to long term gains

When a Midwest DMV with seven main locations and over 50 licensed operator offices leased document scanners from us, leasing made sense at first. But leasing became inefficient.

They chose to purchase the fi-8270 ADF and Flatbed Scanner for more control, security, and savings over time.

### Explore the Options

For multi-location organizations, there are many paths to easier scanning.

**RICOH**  
imagine. change.

## Reliable for ID, fragile & frequent imaging

DMVs require especially reliable scanning for passports, drivers licenses, fragile documents, and forms.

The state chose the scanner for its unique flatbed and ADF (automatic document feeder) design without the typical 180-degree paper path, helping reduce jams and the risk of document damage.

### Safe Handling? No Problem

- ✓ Driver's licenses and ID credentials
- ✓ Passports
- ✓ Proof of address documents
- ✓ Proof of citizenship & birth certificates
- ✓ Historical records

## The DMV sees statewide results

The smoother handling was immediately noticeable, particularly with fragile and thick ID documents. The agency was able to standardize jobs within their systems with PaperStream Software and deploy scan jobs across all PCs statewide through PaperStream Central Admin. Now, scanned documents route automatically to backend processing and are securely deleted upon completion.

## Support like the old days

The DMV appreciated the exceptional, responsive post-purchase service, to deliver on efficiency and support, which RICOH is well-known for.

### Still dealing with clunky scan limits, jams, or aging scanners across locations?

See how the cost-effective fi-8270 scanner can help simplify DMV scanning workflows statewide.
