Digitize Your Business in the Automotive Service Industry

From service order invoices and auto repair claim checks to vehicle inspection forms, your teams are likely manually inputting data from grease-stained or torn paperwork at the end of every day, which is then stored offsite at a premium. This process often leads to labor and storage costs and a frustrating, time-consuming retrieval experience for staff and return customers. So why not shift gears?

Ricoh fi Series Document Scanners coupled with our solutions for delivering and sharing data – EdgeXperience®, NX Manager, and PaperStream Capture—offer simple, cost-effective digitization processes that ensure regulatory compliance and allow your business to perform like a well-oiled machine.

RICOH
imagine. change.

Modernize and digitize for better ROI

In an increasingly paperless world, physical documents are still commonplace at auto service locations. From service records to daily work reports and inventory records, the paper trail for your business needs to be securely scanned and instantly accessible. Our durable scanners – enabled with cutting-edge software – provide a simple way of digitizing critical information to run your business profitably.

- Reduce costs by eliminating the fees associated with paper storage
- Keep clean, accurate records of past customer visits and services
- Scan documents at multiple locations and get instant access across the organization for faster processing and improved efficiency
- Securely share sensitive customer and financial data
- Provide exemplary customer service with fast, easy retrieval of client information

Have critical data at your fingertips

Depending on your store's day-to-day workflows and current scanning infrastructure, we have a wide array of solutions and services for your automotive retail business:

Save time, paper, and space by scanning

Inventory documentation

Gasoline receipts

Daily sales receipts

Warranty documentation

Work reports

Estimates

Sales invoices

Credit card receipts

"We have removed all paper shipping costs and storage, and have instant access to our documents."

"This scanning and archiving platform transformed the way we handle paper across our 31 stores."

—Marty Barrett, CFO,
The Alamos Group

EdgeXperience® with fi-7300NX

Centralize the management of your scanning operations with EdgeXperience®

Rather than having your team build and manage your scanning systems, this SaaS subscription includes the fi-7300NX scanner, centralized management, and is cost efficiency at scale.
