

Long-Term Healthcare  
Industry-Leading  
Scanners  
Equipped To  
Go Where  
Patients Are

Ricoh's industry-leading document scanning solutions are designed to make end-to-end scanning faster and more intuitive—in skilled nursing facilities, assisted living centers, and in-home hospice—so less time is spent processing paperwork and more time is spent caring for others.

Small-footprint Ricoh scanners are built for tight spaces, so they can efficiently digitize, organize, and share information as needed, consistently and effectively, anywhere, anytime. They protect confidentiality at the point of capture, and securely store and organize data for easy reference in the future, improving the quality of care for patients, clients, and residents.

**RICOH**  
imagine. change.

## High-quality fi Series scanners are needed now more than ever

**86%**

Amount of mistakes made in the healthcare industry that are administrative\*

**Up to 17 sq. ft.**

Amount of valuable floor space taken up by each filing cabinet\*\*

**3 out of 10**

Number of tests reordered because the results can't be found\*

**36%**

Amount of survey takers who can't find the most recent version of a paper document most or all of the time†

## High-quality scanners for high-quality care

fi Series scanners make it easy to accurately capture data in myriad settings—in rehab centers or walk-in clinics, at follow-up care or physical therapy. They help you:

- Improve the speed of document processing, billing, and patient release forms
- Improve the accuracy of patient records—reducing duplication, misfiling, and loss
- Provide quick availability of patient data for decision-making in care
- Quickly provide medical records upon request to meet compliance, and share with other medical professionals, specialists, lab assistants, etc.
- Produce exceptionally clean images—often better than the original
- Remove physical storage, making office space available for other purposes
- Maintain an organized and productive work
- Bridge the gap between EMRs and other sources of patient information so everything is integrated in one place

## What we recommend for healthcare environments

For physical therapists to registered nurses, for quiet residences to busy facilities—anywhere documents need to be quickly digitized—fi Series scanners are designed to fit your environment and unique needs.

Save time, paper, and space by scanning

IDs and insurance cards

Lab test requests and results

Patient progress forms

Rehab assessments

Self-evaluation worksheets

Medical records

Insurance claims

Insurance explanation of benefits

Birth and death certificates

## Ricoh Technology Advantage

Through years of engineering innovation, dedication, and persistence, we've created the high-quality industry-leading solutions Ricoh is known for. You can expect superior engineering standards that produce accurate paper feeding and the highest quality images, all optimized for operator use.

You can also count on worldwide reliability and durability—achieved by fusing a master-craftsman style with advanced technology.

## fi-800R

An ultra-compact scanner that scans all types of documents including hard cards

- Half the size of other scanners in its category—perfect for reception areas, mobile workstations, busy administration offices
- Two ways to feed paper:
  - ADF tray holds 20 sheets at a time, perfect for batch scanning
  - Reverse path—flawlessly scans hard cards, IDs, and passports
- Paper feeding is reliable with Automatic Skew Correction and Active Separation technologies

## PaperStream Capture Pro

Advanced imaging software for accurate OCR

- PaperStream IP TWAIN driver provides advanced image processing; document images turn out better than the original
- Predefined profiles make it easy to start scanning—no complex configuration required
- Metadata can be tagged for automatic naming of files and folders; for example, patient name, birth date, or medical ID number
