

Accelerate your digital transformation journey fi-8290

Made for demanding workflows, the fi-8290 is equipped to capture, save, and share precise scans. The flatbed design adds flexibility to scan thick or unwieldy documents and Clear Image Capture (CIC) ensures crisp detail and complete data.

Image Quality

Ricoh proprietary Clear Image Capture (CIC) technology resets the benchmark for high quality image capture, by combining the reliability and flexibility of Contact Imaging Sensor (CIS) hardware with an industry-leading image processor. CIC technology delivers precise, crisp images and industry-leading OCR accuracy rates while also removing unwanted watermarks and artifacts.

Evolved paper handling with a large 100-page hopper, an all-wheel drive mechanism, and fast 180 images captured per minute, make the fi-8290 one of the easiest and most efficient scanners to operate. The patented Automatic Separation Control uses state of the art technology to sense paper weights and adjusts to consistently separate documents and provide the perfect feed, ensuring documents are safely captured.

Reliability

The fi-8290 is built to last and powers up every time you need it regardless of job size. Strong urethane rollers, heavy duty motors, a sturdy frame, and durable consumables combine for a long-lasting scanner that will let your organization capture the volumes of paper from seasonal peaks and heavy backlogs, worry free. Backed by Ricoh's US-based, legendary solutions architects and support teams.

PaperStream IP

Compatible with all major document management software packages, PaperStream IP (PSIP) is a TWAIN/ISIS® compliant driver that cleans up and optimizes scanned images without any configuration.

PaperStream Capture

Take advantage of powerful indexing and sorting features, putting the document in the right location for great organization and fast retrieval. Now includes both 2D and 1D barcode support in the box.

PaperStream ClickScan

Easy to use capture software for any business. Simple scanning interface with 3-steps: scan, select destination, and save.

Flexible connectivity options

Choose between PaperStream IP Net for flexible, adaptable capture architectures, and PaperStream NX Manager for centralized, serverbased capture.

The next generation in scanning excellence fi-8290 Image Scanner
