

# PaperStream® NX Manager

Modernize document workflow by sending critical data directly to your server or cloud, all through a centrally managed platform.

NX Manager is the ideal solution for scanning from multiple locations. This secure, enclosed platform integrates with backend software and reduces the need for added computer hardware. IT Managers can create easy-to-use job buttons to minimize human errors and the need for training.

## Why IT Leaders Choose NX Manager

- Reduce hardware costs by scanning without a PC
- Reduce IT support with easy-to-use functions
- Deploy, customize, manage, and scale multiple scanners

## Scanners Supporting NX Manager

fi-7300NX

- Intuitive user experience
- Easy user authentication

fi-8170

- Industry leading scanner
- Superior paper handling

Also supported: fi-8150/fi-8190/fi-8250/fi-8270/fi-8290

## Additional Benefits

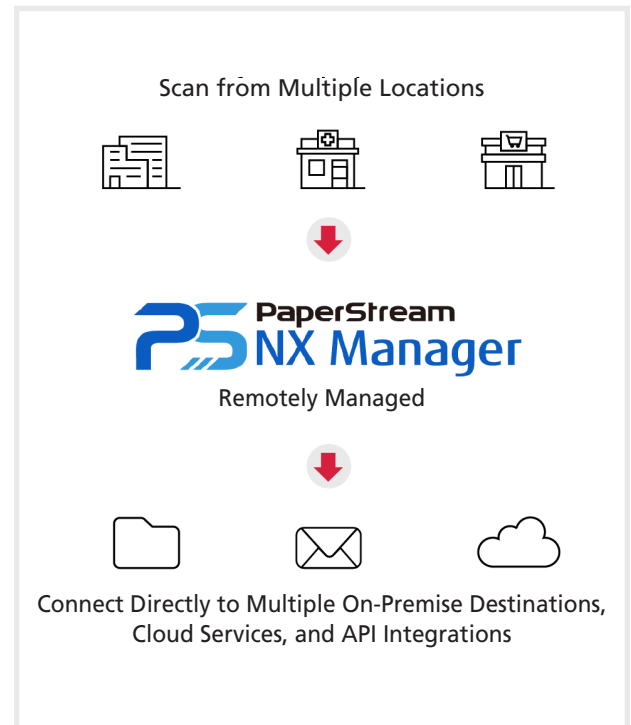

- Manage scalable, secure, and intelligent control over scanner authentication, deployment, and job workflow creation
- Simplify operator experiences with centralized management for job buttons and groups creation
- Achieve reduced output file size through clean image creation

**45%**

of organizations want scanner output to be easily integrated into software systems.<sup>1</sup>

**77%**

of all scanned data are being fed directly into enterprise systems, but need simple integrations.<sup>1</sup>

**“The return on investment played a big factor in our decision to transition to the fi-7300NX scanners. In our warehouse alone, processing time has been cut in half. These scanners have paid for themselves.”**

— Rod Obligacion, General Manager,  
Omni Logistics SFO
